Rafael Miranda Durante

Full-Stack Developer

Nationality BR • IT

about

A software developer with an **AWS Solutions Architect** certificate, with passionate interest for technology, problem solving and knowledge sharing.

I feel comfortable when I am outside my comfort zone. Having an inquisitive mind, there is not a single day I do not learn something new - either to develop expertise or to broaden my knowledge.

As a former manager who worked very close to developers and customers, I have a deep sense of ownership for every work I do. If there is something that requires creativity and resilience, that is for me.

education

* in progress

Introduction to Computer Science

Harvard CS50x Online
 2020

Full-Stack Java & JavaScript Developer

<Academia de Código_>
 (A 14-Week Intensive && Immersive FullStack Programming Bootcamp)

 AWS Solutions Architect Associate

what i do on my spare time

experience

Set 2019 - Present

Full-Stack Developer

Deloitte Portugal

Experience on backend, frontend and infrastructure.

RESTful APIs with Ruby on Rails, MySQL and Angular. Tests with RSpec and Jasmine.

Development of Angular libraries, cli based on Ruby and Thor, AWS Serverless Application and plenty of shell scripts.

Established an effective workflow for the Angular libraries' development using git subtrees and shell scripting.

Infrastructure as code, using AWS CloudFormation and many other services.

Helped newcomers to become familiar with TypeScript and git workflow. Always caring for documentation and exchanging knowledge.

Mar 2012 - Jan 2019

Commercial Manager

AGF Tatuhyby - Brazil

Responsible for driving and planning the company's commercial strategies. I implemented a new ERP, a sales pipeline and KPIs to understand the business from an analytical perspective. Always in touch with developers and customers.

Jan 2010 - Jan 2012

English Teacher

Cultura Inglesa Campinas - Brazil
